

At REEVEsoft, we believe website technology should be easy to use and affordable. CompuAgent provides premium, fully-customizable websites at reasonable prices. Where else can you get so much for so little?

1 dynamic website functionality

CompuAgent provides **unlimited** pages, menu items and graphics. You're not limited to a 10 page site or charged extra if you want to add additional menu items, pages, ...etc.

Fully-integrated IDX/VOW, including nightly MLS downloads, Search by Map and virtual tours.

'My Searches' allows your clients to **save their searches** for later use or to be automatically notified as new matching properties come on the market.

'Save Properties' allows your clients to **'go shopping'** on your website by selecting properties, review their selections, and electronically submit their 'wish list' to you.

In an office plan, every agent gets their own **full-featured website** (not a simple profile page). Office can set up new agents with a website in **2 minutes or less**.

Keeping it simple...

For only \$29.99/month use our pre-designed content and be up and running instantly.

Use CompuAgent's easy Content Management facilities to fully customize every facet of your site as well as manage your leads.

Want flash or a custom design? We provide custom services for only \$35/hour.

2 complete marketing and promotion capabilities

CompuAgent's leads management system includes email marketing, assigning and tracking of leads, and statistics on lead activity.

Mapping and satellite imagery (include bird's eye views in supported areas) of property listings on your website gives clients a comprehensive overview.

CompuAgent **improves promotion** by delivering property search results with **your listings first** on an agent site, then office listings next. You benefit from **higher precedence and exposure** on every other CompuAgent client office or agent site.

CompuAgent websites are **search engine friendly** and **mobile ready**.

Receive text messages to your cell phone when a client signs onto your website.

Create and print flyers easily.

3 a complete office intranet

Send a **broadcast email** to everyone in the office or just to specific agents or staff, wherever there is an Internet connection.

Obtain an **office phone list** wherever there is an Internet connection. The phone list is fully integrated within CompuAgent so it updates automatically whenever an agent changes their contact info.

CompuAgent's **inter-office calendar** provides easier communication of office functions, meetings, floor duty, etc.

CompuAgent's **online repository of useful forms and documents** allows everyone in an office to share commonly used forms, presentations, documents, etc., without having a cabinet full of paper.

4 easy content management system

CompuAgent's *MS Word-like Rich Text Editor* allows you to easily create and edit pages for your website.

Upload and manage graphics, flash animations, media and documents for your website.

Edit property listing descriptions, add captions and descriptions to photos, add/remove photos and even add properties not in the MLS to your website.

Easily change fonts, colors, styles, decorations, scripts, justifications, add hyperlinks, use tables, use symbols, create lists, and more.

Select a template from **CompuAgent's template gallery** or create your own using our template editor.

5 no hassle setup, training and tech support

CompuAgent **provides the initial setup** for your website (office plans as well as agent plans).

Online video training offered 24/7 for new and existing clients to learn how to customize and manage their websites.

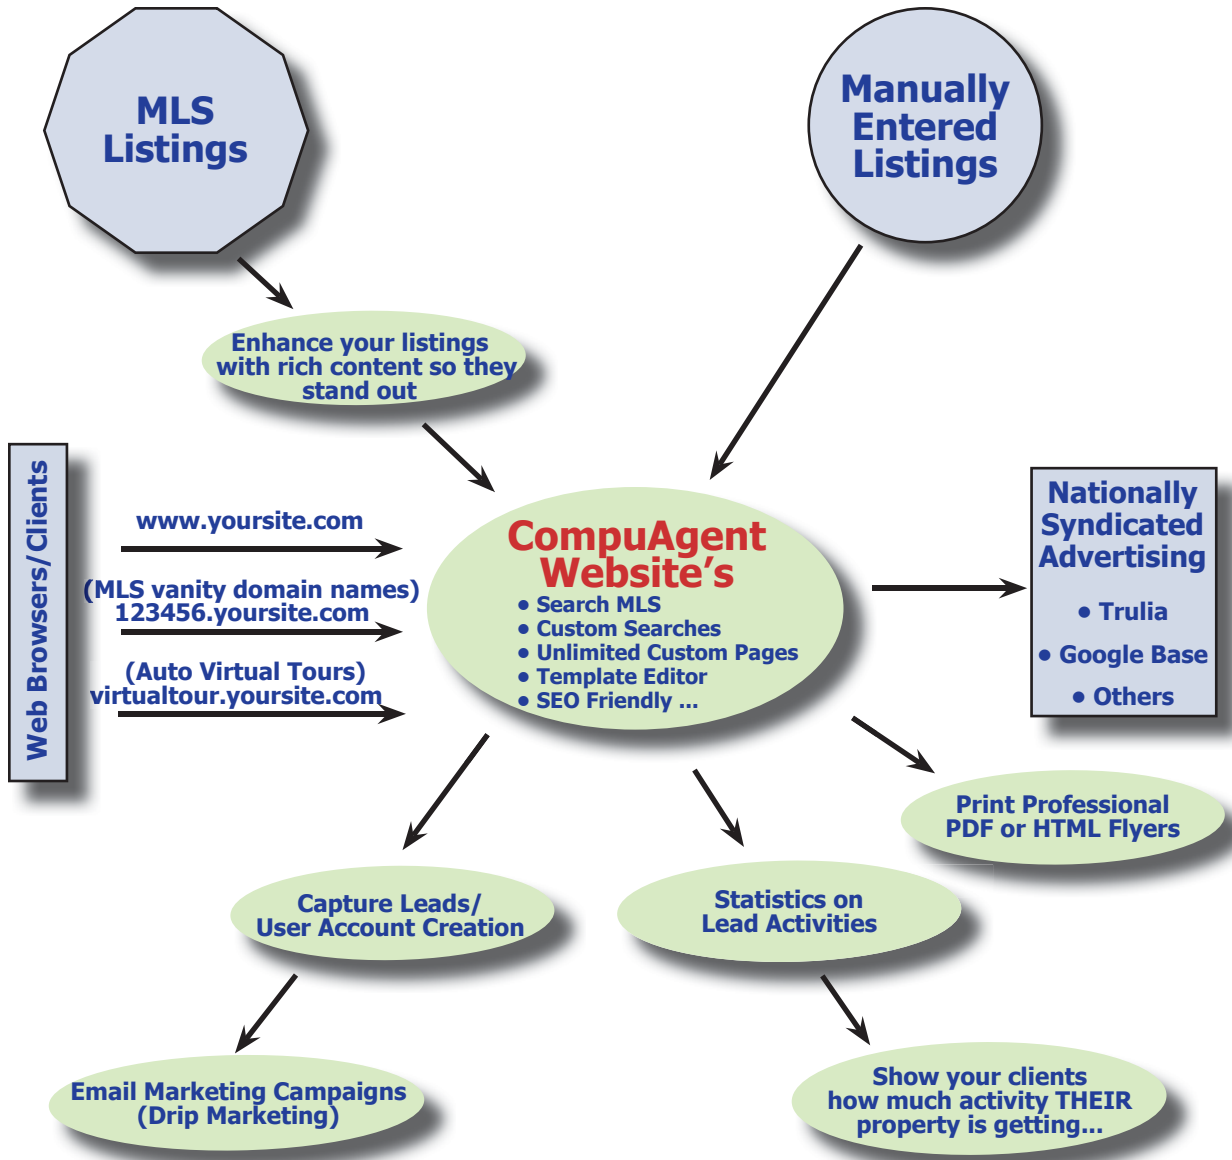

Tech support is available from a **live person** and we use a comprehensive support ticket response and tracking system.

Assistance is provided for **domain name** registration and transfers.

At REEVEsoft, we educate not only how to use our product, but **how to get the most out of your website**.
